

HEALTH & VACCINATION

No special vaccinations are needed for a stay in Myanmar. Medical facilities in Myanmar guarantee a basic level of medical care. In order to prevent cases of diarrhea, however, we recommend to avoid drinking tap water.

When it comes to the **Corona virus** (COVID-19), we follow the recommendations made by the [German Federal Foreign Office](#) as well as the local authorities and the German Embassy on site. In case of any change of the health situation, the tour might be subject to according changes we will inform you about as soon as possible.
